EDUCATION

Politehnica University of Bucharest (UPB) - Bachelor's Student

2024-2028

Computer Science in English, Faculty of Engineering in Foreign Languages (FILS, CTI-E)

EXPERIENCE

Endava - Data Engineer Intern - Bucharest
Present

June 2026 -

- Participating in a structured Data & AI training Dava.X program covering data engineering, ETL pipelines, SQL, Python, cloud technologies, and AI fundamentals such as Copilot and MLOps.
- Collaborating with mentors and peers on practical data engineering exercises while following software development best practices and the Dava Flow approach.

Hackademy - Python Instructor - Bucharest

December 2025 - June 2026

- Was part of the Python team at Hackademy as a volunteer. Taught fundamental Python classes starting from language basics to more advanced concepts to college students from different specialties and faculties.

PROJECTS ([GITHUB](#))

[XAI-Pneumonia-Detection](#) (Python,Django,Deep Learning)

- An explainable AI project which compares the performance of 3 different AI models in recognizing pneumonia in chest X-rays.

[LogoScraping-Classifying](#) (Python,Web Scraping,Deep Learning)

- A Python pipeline that automatically scrapes and clusters company logos by visual similarity using a multi-stage scraping process, deep learning (EfficientNetB0) for feature extraction, and Faiss for efficient clustering.

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** OCI Data Science Professional; OCI AI Foundations Associate; Cambridge C2 Certificate;
- **Programming Languages:** Python, SQL, Java, C++;
- **Data Science & AI/ML Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Keras, SciPy, Matplotlib, Seaborn;
- **Databases:** PostgreSQL, MySQL, Microsoft SQL Server;
- **Developer Tools:** Git, Linux/Unix;
- **Languages:** Romanian (Native); English (C2);
